Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2006 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Analytical techniques

Response Amplitude and Hydrodynamic Force for a Buoy over a Convex — Bi-Jun Wu, Yong-Hong Zheng, and Ya-Ge You; 132 (2), 97-105 (2006).

Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng, Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Explicit Expression for Beach Response to Non-Stationary Forcing near a Groyne — D. E. Reeve; 132 (2), 125-32 (2006).

Australia

Discriminating Modes of Shoreline Response to Offshore-Detached Structures — Ian L. Turner; 132 (3), 180-91 (2006).

Barriers

EOF Analysis of Complex Response of Venice Mobile Gates — Andrea Panizzo, Paolo Sammarco, Giorgio Bellotti, and Paolo De Girolamo; 132 (3), 172-9 (2006).

Bathymetry

Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Beach erosion

Discriminating Modes of Shoreline Response to Offshore-Detached Structures — Ian L. Turner; 132 (3), 180-91 (2006).

Beaches

Modeling Near-Shore Waves, Surface Rollers, and Undertow Velocity Profiles — Yoshimitsu Tajima and Ole Secher Madsen; 132 (6), 429-38 (2006).

Bed load movement

Laboratory Measurements of Bed Load Sediment Transport Dynamics — Hugh J. Roarty and Michael S. Bruno; 132 (3), 199-211 (2006).

Boundaries

Plane Impulse Waves in Reservoirs — Andreas Zweifel, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 358-68 (2006).

Application of a Bottom Boundary Layer Model in Contrasting Wave and Current Environments: Grays Harbor, Washington — Richard Styles; 132 (5), 379-87 (2006).

Water Exchange and Sedimentation in an Estuarine Tidal Harbor Using Three-Dimensional Simulation — Oliver Stoschek and Claus Zimmermann; 132 (5), 410-4 (2006).

Boussinesq equations

Chebyshev Finite-Spectral Method for 1D Boussinesq-Type Equations — Y. S. Li and J. M. Zhan; 132 (3), 212-23 (2006).

Nearshore Wave Modeling with High-Order Boussinesq-Type Equations — Patrick J. Lynett; 132 (5), 348-57 (2006).

Breaking waves

Distributions of Wave Steepness and Surf Parameter — M. Aziz Tayfun; 132 (1), 1-9 (2006).

Well-Balanced Finite-Volume Model for Long-Wave Runup — Yong Wei, Xian-Zhong Mao, and Kwok Fai Cheung; 132 (2), 114-24 (2006).

Nearshore Wave Modeling with High-Order Boussinesq-Type Equations — Patrick J. Lynett; 132 (5), 348-57 (2006).

Modeling Near-Shore Waves, Surface Rollers, and Undertow Velocity Profiles — Yoshimitsu Tajima and Ole Secher Madsen; 132 (6), 429-38 (2006).

Breakwaters

Generic Design of V-Shape and Vane-Type Breakwaters to Reduce Green Water Load Effects on Deck Structures and Containers of Ships: Case Study — Xuan P. Pham and Kamlesh S. Varyani; 132 (1), 57-65 (2006).

Hydrodynamic Characteristics of Pile-Supported Vertical Wall Breakwaters — Kyung-Duck Suh, Sungwon Shin, and Daniel T. Cox; 132 (2), 83-96 (2006).

Large-Scale Experiments on Pore Pressure Generation underneath a Caisson Breakwater — M. Kudella, H. Oumeraci, M. B. de Groot, and P. Meijers; 132 (4), 310-24 (2006).

Liquefaction Phenomena underneath Marine Gravity Structures Subjected to Wave Loads — M. B. de Groot, M. Kudella, P. Meijers, and H. Oumeraci; 132 (4), 325-35 (2006).

Bridges, piers

Design, Construction, and Installation of a Floating Caisson Used as a Bridge Pier — Subrata K. Chakrabarti, Partha Chakrabarti, and M. Sri Krishna; 132 (3), 143-56 (2006).

Buried structures

Burial of Short Cylinders Induced by Scour under Combined Waves and Currents — Yovanni A. Cataño-Lopera and Marcelo H. García; 132 (6), 439-49 (2006).

Caissons

Design, Construction, and Installation of a Floating Caisson Used as a Bridge Pier — Subrata K. Chakrabarti, Partha Chakrabarti, and M. Sri Krishna; 132 (3), 143-56 (2006).

Coastal engineering

Explicit Expression for Beach Response to Non-Stationary Forcing near a Groyne — D. E. Reeve; 132 (2), 125-32 (2006).

Prediction of Long Forcing Waves for Harbor Agitation Studies — Michael Stiassnie and Nitai Drimer; 132 (3), 166-71 (2006).

Coastal environment

Chebyshev Finite-Spectral Method for 1D Boussinesq-Type Equations — Y. S. Li and J. M. Zhan; 132 (3), 212-23 (2006).

Three-Dimensional Modeling of the Ruwais Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Coastal morphology

Explicit Expression for Beach Response to Non-Stationary Forcing near a Groyne — D. E. Reeve; 132 (2), 125-32 (2006).

Development and Validation of a Quasi-Three-Dimensional Coastal Area Morphological Model — Yan Ding, Sam S. Y. Wang, and Yafei Jia; 132 (6), 462-76 (2006).

Coastal processes

Explicit Expression for Beach Response to Non-Stationary Forcing near a Groyne — D. E. Reeve; 132 (2), 125-32 (2006).

Development and Validation of a Quasi-Three-Dimensional Coastal Area Morphological Model — Yan Ding, Sam S. Y. Wang, and Yafei Jia; 132 (6), 462-76 (2006).

Coastal structures

Explicit Expression for Beach Response to Non-Stationary Forcing near a Groyne — D. E. Reeve; 132 (2), 125-32 (2006).

Fluid-Soil-Structure Interaction in Liquefaction around a Cyclically Moving Cylinder — P. Foray, D. Bonjean, H. Michallet, and M. Mory; 132 (4), 289-99 (2006).

Cohesionless sediment

Laboratory Measurements of Bed Load Sediment Transport Dynamics — Hugh J. Roarty and Michael S. Bruno; 132 (3), 199-211 (2006).

Cohesive sediment

Guidelines for Pipeline On-Bottom Stability on Liquefied Noncohesive Seabeds — J. S. Damgaard, B. M. Sumer, T. C. Teh, A. C. Palmer, P. Foray, and D. Osorio; 132 (4), 300-9 (2006).

Computational Fluid Dynamics Analysis of Flow in a Straight Flume for Sediment Erodibility Testing — Thomas M. Ravens and Richard A. Jepsen; 132 (6), 457-61 (2006).

Computation
Alternative Computation of Dean's Overfill Ratio — Kevin R. Bodge; 132 (2), 133-8 (2006).
Finite-Element Computation of Wave-Structure Interaction between Steep Stokes Waves and Vertical Cylinders — J. W. Kim, J. H. Kyoung, R. C. Ertekin, and K. J. Bai; 132 (5), 337-47 (2006).

Computational fluid dynamics technique
Generic Design of V-Shape and Vane-Type Breakwaters to Reduce Green Water Load Effects on Deck Structures and Containers of Ships: Case Study — Xuan P. Pham and Kamlesh S. Varyani; 132 (1), 57-65 (2006).
Computational Fluid Dynamics Analysis of Flow in a Straight Flume for Sediment Erodibility Testing — Thomas M. Ravens and Richard A. Jepsen; 132 (6), 457-61 (2006).

Container transportation
Evaluating the Impact of Vessel-Traffic Interference on Container Terminal Capacity — Wing-Cheong Ng and Ching-Sze Wong; 132 (2), 76-82 (2006).

Contracts
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).

Coupling
DEM-FEM Model of Highly Saturated Soil Motion Due to Seepage Force — Lechosław G. Bierawski and Shiro Maeno; 132 (5), 401-9 (2006).

Currents
Experimental Analysis and Numerical Simulations of Waves and Current Flows Around Low-Crested Rubble-Mound Structures — Barbara Zanuttigh and Alberto Lamberti; 132 (1), 10-27 (2006).
Hydrodynamic Characterization and Modeling of the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).
Application of a Bottom Boundary Layer Model in Contrasting Wave and Current Environments: Grays Harbor, Washington — Richard Styles; 132 (5), 379-87 (2006).
Burial of Short Cylinders Induced by Scour under Combined Waves and Currents — Yovanni A. Cataño-Lopera and Marcelo H. García; 132 (6), 439-49 (2006).
Three-Dimensional Modeling of the Ruwais Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Cyclic loads
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).

Cylinders
Response Amplitude and Hydrodynamic Force for a Buoy over a Convex — Bi-Jun Wu, Yong-Hong Zheng, and Ya-Ge You; 132 (2), 97-105 (2006).
Fluid-Soil-Structure Interaction in Liquefaction around a Cyclically Moving Cylinder — P. Foray, D. Bonjean, H. Michallet, and M. Mory; 132 (4), 289-99 (2006).
Finite-Element Computation of Wave-Structure Interaction between Steep Stokes Waves and Vertical Cylinders — J. W. Kim, J. H. Kyoung, R. C. Ertekin, and K. J. Bai; 132 (5), 337-47 (2006).
Burial of Short Cylinders Induced by Scour under Combined Waves and Currents — Yovanni A. Cataño-Lopera and Marcelo H. García; 132 (6), 439-49 (2006).

Design
Generic Design of V-Shape and Vane-Type Breakwaters to Reduce Green Water Load Effects on Deck Structures and Containers of Ships: Case Study — Xuan P. Pham and Kamlesh S. Varyani; 132 (1), 57-65 (2006).

Discrete elements
DEM-FEM Model of Highly Saturated Soil Motion Due to Seepage Force — Lechosław G. Bierawski and Shiro Maeno; 132 (5), 401-9 (2006).

Drainage
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).

Dynamic models
Simple Dynamic Model for Fender Pile Analysis and Design — A. S. Bradshaw, C. D. P. Baxter, G. Tsiatas, A. Marinucci, J. Ressler, and R. Morgan; 132 (5), 419-22 (2006).

Economic factors
Evaluating the Impact of Vessel-Traffic Interference on Container Terminal Capacity — Wing-Cheong Ng and Ching-Sze Wong; 132 (2), 76-82 (2006).

Eddy viscosity
Modeling Near-Shore Waves, Surface Rollers, and Undertow Velocity Profiles — Yoshimitsu Tajima and Ole Secher Madsen; 132 (6), 429-38 (2006).

Erosion
Computational Fluid Dynamics Analysis of Flow in a Straight Flume for Sediment Erodibility Testing — Thomas M. Ravens and Richard A. Jepsen; 132 (6), 457-61 (2006).

Estuaries
Water Exchange and Sedimentation in an Estuarine Tidal Harbor Using Three-Dimensional Simulation — Oliver Stoschek and Claus Zimmermann; 132 (5), 410-4 (2006).

Evaluation
Evaluating the Impact of Vessel-Traffic Interference on Container Terminal Capacity — Wing-Cheong Ng and Ching-Sze Wong; 132 (2), 76-82 (2006).

Experimentation
Experimental Analysis and Numerical Simulations of Waves and Current Flows Around Low-Crested Rubble-Mound Structures — Barbara Zanuttigh and Alberto Lamberti; 132 (1), 10-27 (2006).
Large-Scale Experiments on Pore Pressure Generation underneath a Caisson Breakwater — M. Kudella, H. Oumeraci, M. B. de Groot, and P. Meijers; 132 (4), 310-24 (2006).

Fenders
Simple Dynamic Model for Fender Pile Analysis and Design — A. S. Bradshaw, C. D. P. Baxter, G. Tsiatas, A. Marinucci, J. Ressler, and R. Morgan; 132 (5), 419-22 (2006).

Filtration
Experimental Analysis and Numerical Simulations of Waves and Current Flows Around Low-Crested Rubble-Mound Structures — Barbara Zanuttigh and Alberto Lamberti; 132 (1), 10-27 (2006).

Finite element method
Finite-Element Computation of Wave-Structure Interaction between Steep Stokes Waves and Vertical Cylinders — J. W. Kim, J. H. Kyoung, R. C. Ertekin, and K. J. Bai; 132 (5), 337-47 (2006).
DEM-FEM Model of Highly Saturated Soil Motion Due to Seepage Force — Lechosław G. Bierawski and Shiro Maeno; 132 (5), 401-9 (2006).

Floating bodies
Wave Forcing of Small Floating Bodies — Rike Grotmaack and Michael H. Meylan; 132 (3), 192-8 (2006).

Floating structures
Experimental Study on the Hydrodynamics of a Floating, Production, Storage, and Offloading System — T. Rajesh Kannah and R. Natarajan; 132 (1), 66-70 (2006).
Design, Construction, and Installation of a Floating Caisson Used as a Bridge Pier — Subrata K. Chakrabarti, Partha Chakrabarti, and M. Sri Krishna; 132 (3), 143-56 (2006).

Flow
Plane Impulse Waves in Reservoirs — Andreas Zweifel, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 358-68 (2006).

Fluid-structure interaction
Fluid-Soil-Structure Interaction in Liquefaction around a Cyclically Moving Cylinder — P. Foray, D. Bonjean, H. Michallet, and M. Mory; 132 (4), 289-99 (2006).
Finite-Element Computation of Wave-Structure Interaction between Steep Stokes Waves and Vertical Cylinders — J. W. Kim, J. H. Kyoung, R. C. Ertekin, and K. J. Bai; 132 (5), 337-47 (2006).
Modeling of Seabed Interaction of Oceanographic Moorings in the Frequency Domain — Seon Han and Mark Grosenbaugh; 132 (6), 450-6 (2006).

Flumes
Computational Fluid Dynamics Analysis of Flow in a Straight Flume for Sediment Erodibility Testing — Thomas M. Ravens and Richard A. Jepsen; 132 (6), 457-61 (2006).

Fractal
Solving Wave Dispersion Equation for Dissipative Media Using Homotopy Perturbation Technique — Hsien-Kuo Chang and Jin-Cheng Liou; 132 (1), 28-35 (2006).

Frequency analysis
Modeling of Seabed Interaction of Oceanographic Moorings in the Frequency Domain — Seon Han and Mark Grosenbaugh; 132 (6), 450-6 (2006).

Gas pipelines
Critical Flotation Density of Pipelines in Soils Liquefied by Waves and Density of Liquefied Soils — B. Mutlu Sumer, Figen Hatipoglu, Jørgen Fredsøe, and Niels-Erik Ottesen Hansen; 132 (4), 252-65 (2006).
Liquefaction around Pipelines under Waves — B. Mutlu Sumer, Christoffer Truelsen, and Jørgen Fredsøe; 132 (4), 266-75 (2006).

Gates
EOF Analysis of Complex Response of Venice Mobile Gates — Andrea Panizzo, Paolo Sammarco, Giorgio Bellotti, and Paolo De Girolamo; 132 (3), 172-9 (2006).

Geotechnical engineering
Stability of Submarine Pipelines on Liquefied Seabeds — T. C. Teh, A. C. Palmer, M. D. Bolton, and J. S. Damgaard; 132 (4), 244-51 (2006).

Grain size
Alternative Computation of Dean's Overfill Ratio — Kevin R. Bodge; 132 (2), 133-8 (2006).

Gulfs
3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).

Three-Dimensional Modeling of the Ruwais Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Harbors
Prediction of Long Forcing Waves for Harbor Agitation Studies — Michael Stiassnie and Nitai Drimer; 132 (3), 166-71 (2006).

Application of a Bottom Boundary Layer Model in Contrasting Wave and Current Environments: Grays Harbor, Washington — Richard Styles; 132 (5), 379-87 (2006).

Water Exchange and Sedimentation in an Estuarine Tidal Harbor Using Three-Dimensional Simulation — Oliver Stoschek and Claus Zimmermann; 132 (5), 410-4 (2006).

Hong Kong
Evaluating the Impact of Vessel-Traffic Interference on Container Terminal Capacity — Wing-Cheong Ng and Ching-Sze Wong; 132 (2), 76-82 (2006).

Hydraulic structures
Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng, Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Hydrodynamics
Hydrodynamic Characterization and Modeling of the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).

Experimental Study on the Hydrodynamics of a Floating, Production, Storage, and Offloading System — T. Rajesh Kannah and R. Natarajan; 132 (1), 66-70 (2006).

Response Amplitude and Hydrodynamic Force for a Buoy over a Convex — Bi-Jun Wu, Yong-Hong Zheng, and Ya-Ge You; 132 (2), 97-105 (2006).

3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).

Modeling Near-Shore Waves, Surface Rollers, and Undertow Velocity Profiles — Yoshimitsu Tajima and Ole Secher Madsen; 132 (6), 429-38 (2006).

Hydrologic models
Nearshore Wave Modeling with High-Order Boussinesq-Type Equations — Patrick J. Lynett; 132 (5), 348-57 (2006).

Internal waves
Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Transformation, Attenuation, Setup, and Undertow of Internal Waves on a Gentle Slope — Motohiko Umeyama and Tetsuya Shintani; 132 (6), 477-86 (2006).

Italy
EOF Analysis of Complex Response of Venice Mobile Gates — Andrea Panizzo, Paolo Sammarco, Giorgio Bellotti, and Paolo De Girolamo; 132 (3), 172-9 (2006).

Japan
Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Laboratory tests
Hydrodynamic Characteristics of Pile-Supported Vertical Wall Breakwaters — Kyung-Duck Suh, Sungwon Shin, and Daniel T. Cox; 132 (2), 83-96 (2006).

Liquefaction
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).

Stability of Submarine Pipelines on Liquefied Seabeds — T. C. Teh, A. C. Palmer, M. D. Bolton, and J. S. Damgaard; 132 (4), 244-51 (2006).

Critical Flotation Density of Pipelines in Soils Liquefied by Waves and Density of Liquefied Soils — B. Mutlu Sumer, Figen Hatipoglu, Jørgen Fredsøe, and Niels-Erik Ottesen Hansen; 132 (4), 252-65 (2006).

Liquefaction around Pipelines under Waves — B. Mutlu Sumer, Christoffer Truelsen, and Jørgen Fredsøe; 132 (4), 266-75 (2006).

Numerical Modeling of Wave-Induced Liquefaction around Pipelines — S. L. Dunn, P. L. Vun, A. H. C. Chan, and J. S. Damgaard; 132 (4), 276-88 (2006).

Guidelines for Pipeline On-Bottom Stability on Liquefied Noncohesive Seabeds — J. S. Damgaard, B. M. Sumer, T. C. Teh, A. C. Palmer, P. Foray, and D. Osorio; 132 (4), 300-9 (2006).

Large-Scale Experiments on Pore Pressure Generation underneath a Caisson Breakwater — M. Kudella, H. Oumeraci, M. B. de Groot, and P. Meijers; 132 (4), 310-24 (2006).

Liquefaction Phenomena underneath Marine Gravity Structures Subjected to Wave Loads — M. B. de Groot, M. Kudella, P. Meijers, and H. Oumeraci; 132 (4), 325-35 (2006).

Long waves
Well-Balanced Finite-Volume Model for Long-Wave Runup — Yong Wei, Xian-Zhong Mao, and Kwok Fai Cheung; 132 (2), 114-24 (2006).

Prediction of Long Forcing Waves for Harbor Agitation Studies — Michael Stiassnie and Nitai Drimer; 132 (3), 166-71 (2006).

Maximum Fluid Forces in the Tsunami Runup Zone — Harry Yeh; 132 (6), 496-500 (2006).

Mathematical models
Explicit Expression for Beach Response to Non-Stationary Forcing near a Groyne — D. E. Reeve; 132 (2), 125-32 (2006).

Middle East
3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).

Three-Dimensional Modeling of the Ruwais Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Models
Wave Forcing of Small Floating Bodies — Rike Grotmaack and Michael H. Meylan; 132 (3), 192-8 (2006).

Mooring
Experimental Study on the Hydrodynamics of a Floating, Production, Storage, and Offloading System — T. Rajesh Kannah and R. Natarajan; 132 (1), 66-70 (2006).

Modeling of Seabed Interaction of Oceanographic Moorings in the Frequency Domain — Seon Han and Mark Grosenbaugh; 132 (6), 450-6 (2006).

Nearshore
Nearshore Wave Modeling with High-Order Boussinesq-Type Equations — Patrick J. Lynett; 132 (5), 348-57 (2006).

Numerical and Experimental Study on Ship Wash Including Wave-Breaking on Shore — Chun-Beom Hong and Yasuaki Doi; 132 (5), 369-78 (2006).

Modeling Near-Shore Waves, Surface Rollers, and Undertow Velocity Profiles — Yoshimitsu Tajima and Ole Secher Madsen; 132 (6), 429-38 (2006).

Nearshore circulation
Development and Validation of a Quasi-Three-Dimensional Coastal Area Morphological Model — Yan Ding, Sam S. Y. Wang, and Yafei Jia; 132 (6), 462-76 (2006).

Networks
Application of Artificial Neural Network Model in Estimation of Wave Spectra — Shailesh Namekar and M. C. Deo; 132 (5), 415-8 (2006).

Neural networks
Application of Artificial Neural Network Model in Estimation of Wave Spectra — Shailesh Namekar and M. C. Deo; 132 (5), 415-8 (2006).

Numerical models
Chebyshev Finite-Spectral Method for 1D Boussinesq-Type Equations — Y. S. Li and J. M. Zhan; 132 (3), 212-23 (2006).

Numerical Modeling of Wave-Induced Liquefaction around Pipelines — S. L. Dunn, P. L. Vun, A. H. C. Chan, and J. S. Damgaard; 132 (4), 276-88 (2006).

DEM-FEM Model of Highly Saturated Soil Motion Due to Seepage Force — Lechosław G. Bierawski and Shiro Maeno; 132 (5), 401-9 (2006).

Development and Validation of a Quasi-Three-Dimensional Coastal Area Morphological

Model — Yan Ding, Sam S. Y. Wang, and Yafei Jia; 132 (6), 462-76 (2006).

Ocean bottom
Modeling of Seabed Interaction of Oceanographic Moorings in the Frequency Domain — Seon Han and Mark Grosenbaugh; 132 (6), 450-6 (2006).

Ocean engineering
Numerical and Experimental Study on Ship Wash Including Wave-Breaking on Shore — Chun-Beom Hong and Yasuaki Doi; 132 (5), 369-78 (2006).

Oceanography
Modeling of Seabed Interaction of Oceanographic Moorings in the Frequency Domain — Seon Han and Mark Grosenbaugh; 132 (6), 450-6 (2006).

Offshore structures
Discriminating Modes of Shoreline Response to Offshore-Detached Structures — Ian L. Turner; 132 (3), 180-91 (2006).

Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).

Numerical Modeling of Wave-Induced Liquefaction around Pipelines — S. L. Dunn, P. L. Vun, A. H. C. Chan, and J. S. Damgaard; 132 (4), 276-88 (2006).

Fluid-Soil-Structure Interaction in Liquefaction around a Cyclically Moving Cylinder — P. Foray, D. Bonjean, H. Michallet, and M. Mory; 132 (4), 289-99 (2006).

Liquefaction Phenomena underneath Marine Gravity Structures Subjected to Wave Loads — M. B. de Groot, M. Kudella, P. Meijers, and H. Oumeraci; 132 (4), 325-35 (2006).

Finite-Element Computation of Wave-Structure Interaction between Steep Stokes Waves and Vertical Cylinders — J. W. Kim, J. H. Kyoung, R. C. Ertekin, and K. J. Bai; 132 (5), 337-47 (2006).

Overland flow
Maximum Fluid Forces in the Tsunami Runup Zone — Harry Yeh; 132 (6), 496-500 (2006).

Parameters
Distributions of Wave Steepness and Surf Parameter — M. Aziz Tayfun; 132 (1), 1-9 (2006).

Particles
Laboratory Measurements of Bed Load Sediment Transport Dynamics — Hugh J. Roarty and Michael S. Bruno; 132 (3), 199-211 (2006).

Perturbation
Solving Wave Dispersion Equation for Dissipative Media Using Homotopy Perturbation Technique — Hsien-Kuo Chang and Jin-Cheng Liou; 132 (1), 28-35 (2006).

Piles
Simple Dynamic Model for Fender Pile Analysis and Design — A. S. Bradshaw, C. D. P. Baxter, G. Tsiatas, A. Marinucci, J. Ressler, and R. Morgan; 132 (5), 419-22 (2006).

Pipelines
Numerical Modeling of Wave-Induced Liquefaction around Pipelines — S. L. Dunn, P. L. Vun, A. H. C. Chan, and J. S. Damgaard; 132 (4), 276-88 (2006).

Guidelines for Pipeline On-Bottom Stability on Liquefied Noncohesive Seabeds — J. S. Damgaard, B. M. Sumer, T. C. Teh, A. C. Palmer, P. Foray, and D. Osorio; 132 (4), 300-9 (2006).

Platforms
Liquefaction Phenomena underneath Marine Gravity Structures Subjected to Wave Loads — M. B. de Groot, M. Kudella, P. Meijers, and H. Oumeraci; 132 (4), 325-35 (2006).

Polynomials
Chebyshev Finite-Spectral Method for 1D Boussinesq-Type Equations — Y. S. Li and J. M. Zhan; 132 (3), 212-23 (2006).

Pore pressure
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).

Pore water pressure
Large-Scale Experiments on Pore Pressure Generation underneath a Caisson Breakwater — M. Kudella, H. Oumeraci, M. B. de Groot, and P. Meijers; 132 (4), 310-24 (2006).

Porous media
Solving Wave Dispersion Equation for Dissipative Media Using Homotopy Perturbation Technique — Hsien-Kuo Chang and Jin-Cheng Liou; 132 (1), 28-35 (2006).

Random waves
Prediction of Long Forcing Waves for Harbor Agitation Studies — Michael Stiassnie and Nitai Drimer; 132 (3), 166-71 (2006).

Reefs
Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Reservoirs
Plane Impulse Waves in Reservoirs — Andreas Zweifel, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 358-68 (2006).

Resonance
Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

Rubble-mound breakwaters
Experimental Analysis and Numerical Simulations of Waves and Current Flows Around Low-Crested Rubble-Mound Structures — Barbara Zanuttigh and Alberto Lamberti; 132 (1), 10-27 (2006).

Salinity
Hydrodynamic Characterization and Modeling of the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).

Scour
Burial of Short Cylinders Induced by Scour under Combined Waves and Currents — Yovanni A. Cataño-Lopera and Marcelo H. García; 132 (6), 439-49 (2006).

Sea floor
Stability of Submarine Pipelines on Liquefied Seabeds — T. C. Teh, A. C. Palmer, M. D. Bolton, and J. S. Damgaard; 132 (4), 244-51 (2006).

Sea walls
Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

Sediment
Alternative Computation of Dean's Overfill Ratio -- Kevin R. Bodge; 132 (2), 133-8 (2006).

Application of a Bottom Boundary Layer Model in Contrasting Wave and Current Environments: Grays Harbor, Washington — Richard Styles; 132 (5), 379-87 (2006).

Sediment transport
Laboratory Measurements of Bed Load Sediment Transport Dynamics — Hugh J. Roarty and Michael S. Bruno; 132 (3), 199-211 (2006).

Sedimentation
Water Exchange and Sedimentation in an Estuarine Tidal Harbor Using Three-Dimensional Simulation — Oliver Stoschek and Claus Zimmermann; 132 (5), 410-4 (2006).

Seepage
DEM-FEM Model of Highly Saturated Soil Motion Due to Seepage Force — Lechosław G. Bierawski and Shiro Maeno; 132 (5), 401-9 (2006).

Shallow water
Well-Balanced Finite-Volume Model for Long-Wave Runup — Yong Wei, Xian-Zhong Mao, and Kwok Fai Cheung; 132 (2), 114-24 (2006).

Shear strength
Computational Fluid Dynamics Analysis of Flow in a Straight Flume for Sediment Erodibility Testing — Thomas M. Ravens and Richard A. Jepsen; 132 (6), 457-61 (2006).

Shear stress
Computational Fluid Dynamics Analysis of Flow in a Straight Flume for Sediment Erodibility Testing — Thomas M. Ravens and Richard A. Jepsen; 132 (6), 457-61 (2006).

Ships
Generic Design of V-Shape and Vane-Type Breakwaters to Reduce Green Water Load Effects on Deck Structures and Containers of Ships: Case Study — Xuan P. Pham and Kamlesh S. Varyani; 132 (1), 57-65 (2006).

Experimental Study on the Hydrodynamics of a Floating, Production, Storage, and Offloading System — T. Rajesh Kannah and R. Natarajan; 132 (1), 66-70 (2006).

Shoreline changes
Discriminating Modes of Shoreline Response to Offshore-Detached Structures — Ian L. Turner; 132 (3), 180-91 (2006).

Simulation
Experimental Analysis and Numerical Simulations of Waves and Current Flows Around Low-Crested Rubble-Mound Structures — Barbara Zanuttigh and Alberto Lamberti; 132 (1), 10-27 (2006).

Evaluating the Impact of Vessel-Traffic Interference on Container Terminal Capacity — Wing-Cheong Ng and Ching-Sze Wong; 132 (2), 76-82 (2006).

Water Exchange and Sedimentation in an Estuarine Tidal Harbor Using Three-Dimensional Simulation — Oliver Stoschek and Claus Zimmermann; 132 (5), 410-4 (2006).

Three-Dimensional Modeling of the Ruwais

Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Sliding

Plane Impulse Waves in Reservoirs — Andreas Zweifel, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 358-68 (2006).

Slopes

Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Transformation, Attenuation, Setup, and Undertow of Internal Waves on a Gentle Slope — Motohiko Umeyama and Tetsuya Shintani; 132 (6), 477-86 (2006).

Soil deformation

Large-Scale Experiments on Pore Pressure Generation underneath a Caisson Breakwater — M. Kudella, H. Oumeraci, M. B. de Groot, and P. Meijers; 132 (4), 310-24 (2006).

Solitary waves

Well-Balanced Finite-Volume Model for Long-Wave Runup — Yong Wei, Xian-Zhong Mao, and Kwok Fai Cheung; 132 (2), 114-24 (2006).

Statistical models

Distributions of Wave Steepness and Surf Parameter — M. Aziz Tayfun; 132 (1), 1-9 (2006).

Statistics

Distributions of Wave Steepness and Surf Parameter — M. Aziz Tayfun; 132 (1), 1-9 (2006).

Submarine pipelines

Stability of Submarine Pipelines on Liquefied Seabeds — T. C. Teh, A. C. Palmer, M. D. Bolton, and J. S. Damgaard; 132 (4), 244-51 (2006).

Surf zone

Distributions of Wave Steepness and Surf Parameter — M. Aziz Tayfun; 132 (1), 1-9 (2006).

Modeling Near-Shore Waves, Surface Rollers, and Undertow Velocity Profiles — Yoshimitsu Tajima and Ole Secher Madsen; 132 (6), 429-38 (2006).

Tanks

Laboratory Measurements of Bed Load Sediment Transport Dynamics — Hugh J. Roarty and Michael S. Bruno; 132 (3), 199-211 (2006).

Temperature

Hydrodynamic Characterization and Modeling of the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).

Three-dimensional analysis

Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

Three-dimensional flow

Numerical and Experimental Study on Ship Wash Including Wave-Breaking on Shore — Chun-Beom Hong and Yasuaki Doi; 132 (5), 369-78 (2006).

Three-dimensional models

3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).

Water Exchange and Sedimentation in an Estuarine Tidal Harbor Using Three-Dimensional Simulation — Oliver Stoschek and Claus Zimmermann; 132 (5), 410-4 (2006).

Development and Validation of a Quasi-Three-Dimensional Coastal Area Morphological Model — Yan Ding, Sam S. Y. Wang, and Yafei Jia; 132 (6), 462-76 (2006).

Tidal currents

Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Tidal effects

EOF Analysis of Complex Response of Venice Mobile Gates — Andrea Panizzo, Paolo Sammarco, Giorgio Bellotti, and Paolo De Girolamo; 132 (3), 172-9 (2006).

Tides

Hydrodynamic Characterization and Modeling of the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).

EOF Analysis of Complex Response of Venice Mobile Gates — Andrea Panizzo, Paolo Sammarco, Giorgio Bellotti, and Paolo De Girolamo; 132 (3), 172-9 (2006).

Water Exchange and Sedimentation in an Estuarine Tidal Harbor Using Three-Dimensional Simulation — Oliver Stoschek and Claus Zimmermann; 132 (5), 410-4 (2006).

Three-Dimensional Modeling of the Ruwais Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Tracers

Three-Dimensional Modeling of the Ruwais Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Transformation

Transformation, Attenuation, Setup, and Undertow of Internal Waves on a Gentle Slope — Motohiko Umeyama and Tetsuya Shintani; 132 (6), 477-86 (2006).

Tsunamis

Maximum Fluid Forces in the Tsunami Runup Zone — Harry Yeh; 132 (6), 496-500 (2006).

Two phase flow

Numerical and Experimental Study on Ship Wash Including Wave-Breaking on Shore — Chun-Beom Hong and Yasuaki Doi; 132 (5), 369-78 (2006).

Undertow

Modeling Near-Shore Waves, Surface Rollers, and Undertow Velocity Profiles — Yoshimitsu Tajima and Ole Secher Madsen; 132 (6), 429-38 (2006).

Transformation, Attenuation, Setup, and Undertow of Internal Waves on a Gentle Slope — Motohiko Umeyama and Tetsuya Shintani; 132 (6), 477-86 (2006).

Underwater pipelines

Critical Flotation Density of Pipelines in Soils Liquefied by Waves and Density of Liquefied Soils — B. Mutlu Sumer, Figen Hatipoglu, Jørgen Fredsøe, and Niels-Erik Ottesen Hansen; 132 (4), 252-65 (2006).

Liquefaction around Pipelines under Waves — B. Mutlu Sumer, Christoffer Truelsen, and Jørgen Fredsøe; 132 (4), 266-75 (2006).

United Arab Emirates

Hydrodynamic Characterization and Modeling of the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).

Velocity

Generic Design of V-Shape and Vane-Type Breakwaters to Reduce Green Water Load Effects on Deck Structures and Containers of Ships: Case Study — Xuan P. Pham and Kamlesh S. Varyani; 132 (1), 57-65 (2006).

Response Amplitude and Hydrodynamic Force for a Buoy over a Convex — Bi-Jun Wu, Yong-Hong Zheng, and Ya-Ge You; 132 (2), 97-105 (2006).

Laboratory Measurements of Bed Load Sediment Transport Dynamics — Hugh J. Roarty and Michael S. Bruno; 132 (3), 199-211 (2006).

Burial of Short Cylinders Induced by Scour under Combined Waves and Currents — Yovanni A. Cataño-Lopera and Marcelo H. García; 132 (6), 439-49 (2006).

Washington

Design, Construction, and Installation of a Floating Caisson Used as a Bridge Pier — Subrata K. Chakrabarti, Partha Chakrabarti, and M. Sri Krishna; 132 (3), 143-56 (2006).

Water circulation

3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).

Water crest

Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

Water temperature

Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Water waves

Solving Wave Dispersion Equation for Dissipative Media Using Homotopy Perturbation Technique — Hsien-Kuo Chang and Jin-Cheng Liou; 132 (1), 28-35 (2006).

Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng, Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Waterfront structures

Generic Design of V-Shape and Vane-Type Breakwaters to Reduce Green Water Load Effects on Deck Structures and Containers of Ships: Case Study — Xuan P. Pham and Kamlesh S. Varyani; 132 (1), 57-65 (2006).

Waterways
Numerical and Experimental Study on Ship Wash Including Wave-Breaking on Shore — Chun-Beom Hong and Yasuaki Doi; 132 (5), 369-78 (2006).

Wave diffraction
Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng, Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Development and Validation of a Quasi-Three-Dimensional Coastal Area Morphological Model — Yan Ding, Sam S. Y. Wang, and Yafei Jia; 132 (6), 462-76 (2006).

Wave dispersion
Solving Wave Dispersion Equation for Dissipative Media Using Homotopy Perturbation Technique — Hsien-Kuo Chang and Jin-Cheng Liou; 132 (1), 28-35 (2006).

Wave energy
Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Response Amplitude and Hydrodynamic Force for a Buoy over a Convex — Bi-Jun Wu, Yong-Hong Zheng, and Ya-Ge You; 132 (2), 97-105 (2006).

Wave forces
Hydrodynamic Characteristics of Pile-Supported Vertical Wall Breakwaters — Kyung-Duck Suh, Sungwon Shin, and Daniel T. Cox; 132 (2), 83-96 (2006).

Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng, Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

Wave Forcing of Small Floating Bodies — Rike Grotmaack and Michael H. Meylan; 132 (3), 192-8 (2006).

Maximum Fluid Forces in the Tsunami Runup Zone — Harry Yeh; 132 (6), 496-500 (2006).

Wave measurement
Distributions of Wave Steepness and Surf Parameter — M. Aziz Tayfun; 132 (1), 1-9 (2006).

Application of Artificial Neural Network Model in Estimation of Wave Spectra — Shailesh Namekar and M. C. Deo; 132 (5), 415-8 (2006).

Wave overtopping
Experimental Analysis and Numerical Simulations of Waves and Current Flows Around Low-Crested Rubble-Mound Structures — Barbara Zanuttigh and Alberto Lamberti; 132 (1), 10-27 (2006).

Wave propagation
Chebyshev Finite-Spectral Method for 1D Boussinesq-Type Equations — Y. S. Li and J. M. Zhan; 132 (3), 212-23 (2006).

Wave reflection
Hydrodynamic Characteristics of Pile-Supported Vertical Wall Breakwaters — Kyung-Duck Suh, Sungwon Shin, and Daniel T. Cox; 132 (2), 83-96 (2006).

Wave runup
Well-Balanced Finite-Volume Model for Long-Wave Runup — Yong Wei, Xian-Zhong Mao, and Kwok Fai Cheung; 132 (2), 114-24 (2006).

Numerical and Experimental Study on Ship Wash Including Wave-Breaking on Shore — Chun-Beom Hong and Yasuaki Doi; 132 (5), 369-78 (2006).

Maximum Fluid Forces in the Tsunami Runup Zone — Harry Yeh; 132 (6), 496-500 (2006).

Wave spectra
Prediction of Long Forcing Waves for Harbor Agitation Studies — Michael Stiassnie and Nitai Drimer; 132 (3), 166-71 (2006).

Application of Artificial Neural Network Model in Estimation of Wave Spectra — Shailesh Namekar and M. C. Deo; 132 (5), 415-8 (2006).

Waves
Stability of Submarine Pipelines on Liquefied Seabeds — T. C. Teh, A. C. Palmer, M. D. Bolton, and J. S. Damgaard; 132 (4), 244-51 (2006).

Critical Flotation Density of Pipelines in Soils Liquefied by Waves and Density of Liquefied Soils — B. Mutlu Sumer, Figen Hatipoglu, Jørgen Fredsøe, and Niels-Erik Ottesen Hansen; 132 (4), 252-65 (2006).

Liquefaction around Pipelines under Waves — B. Mutlu Sumer, Christoffer Truelsen, and Jørgen Fredsøe; 132 (4), 266-75 (2006).

Numerical Modeling of Wave-Induced Liquefaction around Pipelines — S. L. Dunn, P. L. Vun, A. H. C. Chan, and J. S. Damgaard; 132 (4), 276-88 (2006).

Liquefaction Phenomena underneath Marine Gravity Structures Subjected to Wave Loads — M. B. de Groot, M. Kudella, P. Meijers, and H. Oumeraci; 132 (4), 325-35 (2006).

Plane Impulse Waves in Reservoirs — Andreas Zweifel, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 358-68 (2006).

Application of a Bottom Boundary Layer Model in Contrasting Wave and Current Environments: Grays Harbor, Washington — Richard Styles; 132 (5), 379-87 (2006).

Wind
Hydrodynamic Characterization and Modeling of the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).

Wind waves
Distributions of Wave Steepness and Surf Parameter — M. Aziz Tayfun; 132 (1), 1-9 (2006).

Author Index

Absi, Rafik
Discussion of "One-Dimensional Wave Bottom Boundary Layer Model Comparison: Specific Eddy Viscosity and Turbulence Closure Models" by Jack A. Puleo, Oleg Mouraenko, and Daniel M. Hanes — Rafik Absi; 132 (2), 139-41 (2006).

Azam, Mir Hammadul
Hydrodynamic Characterization and Modeling of the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).
3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).
Three-Dimensional Modeling of the Ruwais Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Bai, K. J.
Finite-Element Computation of Wave-Structure Interaction between Steep Stokes Waves and Vertical Cylinders — J. W. Kim, J. H. Kyoung, R. C. Ertekin, and K. J. Bai; 132 (5), 337-47 (2006).

Balas, Can Elmar
Closure to "Predictions of Missing Wave Data by Recurrent Neuronets" by Can Elmar Balas, Levent Koç, and Lale Balas — Can Elmar Balas, Levent Koç, and Lale Balas; 132 (1), 72-4 (2006).

Balas, Lale
Closure to "Predictions of Missing Wave Data by Recurrent Neuronets" by Can Elmar Balas, Levent Koç, and Lale Balas — Can Elmar Balas, Levent Koç, and Lale Balas; 132 (1), 72-4 (2006).

Baxter, C. D. P.
Simple Dynamic Model for Fender Pile Analysis and Design — A. S. Bradshaw, C. D. P. Baxter, G. Tsiatas, A. Marinucci, J. Ressler, and R. Morgan; 132 (5), 419-22 (2006).

Bellotti, Giorgio
EOF Analysis of Complex Response of Venice Mobile Gates — Andrea Panizzo, Paolo Sammarco, Giorgio Bellotti, and Paolo De Girolamo; 132 (3), 172-9 (2006).

Bierawski, Lechosław G.
DEM-FEM Model of Highly Saturated Soil Motion Due to Seepage Force — Lechosław G. Bierawski and Shiro Maeno; 132 (5), 401-9 (2006).

Bodge, Kevin R.
Alternative Computation of Dean's Overfill Ratio — Kevin R. Bodge; 132 (2), 133-8 (2006).

Bolton, M. D.
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).
Stability of Submarine Pipelines on Liquefied Seabeds — T. C. Teh, A. C. Palmer, M. D. Bolton, and J. S. Damgaard; 132 (4), 244-51 (2006).

Bonjean, D.
Fluid-Soil-Structure Interaction in Liquefaction around a Cyclically Moving Cylinder — P. Foray, D. Bonjean, H. Michallet, and M. Mory; 132 (4), 289-99 (2006).

Bradshaw, A. S.
Simple Dynamic Model for Fender Pile Analysis and Design — A. S. Bradshaw, C. D. P. Baxter, G. Tsiatas, A. Marinucci, J. Ressler, and R. Morgan; 132 (5), 419-22 (2006).

Bruno, Michael S.
Laboratory Measurements of Bed Load Sediment Transport Dynamics — Hugh J. Roarty and Michael S. Bruno; 132 (3), 199-211 (2006).

Cataño-Lopera, Yovanni A.
Burial of Short Cylinders Induced by Scour under Combined Waves and Currents — Yovanni A. Cataño-Lopera and Marcelo H. García; 132 (6), 439-49 (2006).

Chakrabarti, Partha
Design, Construction, and Installation of a Floating Caisson Used as a Bridge Pier — Subrata K. Chakrabarti, Partha Chakrabarti, and M. Sri Krishna; 132 (3), 143-56 (2006).

Chakrabarti, Subrata K.
Design, Construction, and Installation of a Floating Caisson Used as a Bridge Pier — Subrata K. Chakrabarti, Partha Chakrabarti, and M. Sri Krishna; 132 (3), 143-56 (2006).

Chan, A. H. C.
Numerical Modeling of Wave-Induced Liquefaction around Pipelines — S. L. Dunn, P. L. Vun, A. H. C. Chan, and J. S. Damgaard; 132 (4), 276-88 (2006).

Chang, Hsien-Kuo
Solving Wave Dispersion Equation for Dissipative Media Using Homotopy Perturbation Technique — Hsien-Kuo Chang and Jin-Cheng Liou; 132 (1), 28-35 (2006).

Cheung, Kwok Fai
Well-Balanced Finite-Volume Model for Long-Wave Runup — Yong Wei, Xian-Zhong Mao, and Kwok Fai Cheung; 132 (2), 114-24 (2006).

Choi, Hangseok
Closure to "Settlement of Dredged and Contaminated Material Placement Areas. II: Primary Consolidation, Secondary Compression, and Desiccation of Dredged Fill Input Parameters" by Timothy D. Stark, Hangseok Choi, and Paul R. Schroeder — Timothy D. Stark, Hangseok Choi, and Paul R. Schroeder; 132 (5), 424-5 (2006).

Cornier, S.
Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

Cox, Daniel T.
Hydrodynamic Characteristics of Pile-Supported Vertical Wall Breakwaters — Kyung-Duck Suh, Sungwon Shin, and Daniel T. Cox; 132 (2), 83-96 (2006).

Damgaard, J. S.
Stability of Submarine Pipelines on Liquefied Seabeds — T. C. Teh, A. C. Palmer, M. D. Bolton, and J. S. Damgaard; 132 (4), 244-51 (2006).
Numerical Modeling of Wave-Induced Liquefaction around Pipelines — S. L. Dunn, P. L. Vun, A. H. C. Chan, and J. S. Damgaard; 132 (4), 276-88 (2006).
Guidelines for Pipeline On-Bottom Stability on Liquefied Noncohesive Seabeds — J. S. Damgaard, B. M. Sumer, T. C. Teh, A. C. Palmer, P. Foray, and D. Osorio; 132 (4), 300-9 (2006).

De Girolamo, Paolo
EOF Analysis of Complex Response of Venice Mobile Gates — Andrea Panizzo, Paolo Sammarco, Giorgio Bellotti, and Paolo De Girolamo; 132 (3), 172-9 (2006).

de Groot, M. B.
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).
Large-Scale Experiments on Pore Pressure Generation underneath a Caisson Breakwater — M. Kudella, H. Oumeraci, M. B. de Groot, and P. Meijers; 132 (4), 310-24 (2006).
Liquefaction Phenomena underneath Marine Gravity Structures Subjected to Wave Loads — M. B. de Groot, M. Kudella, P. Meijers, and H. Oumeraci; 132 (4), 325-35 (2006).

Demirbilek, Zeki
Book Reviews — Zeki Demirbilek; 132 (5), 427-8 (2006).

Deo, M. C.
Application of Artificial Neural Network Model in Estimation of Wave Spectra — Shailesh Namekar and M. C. Deo; 132 (5), 415-8 (2006).

Ding, Yan
Development and Validation of a Quasi-Three-Dimensional Coastal Area Morphological Model — Yan Ding, Sam S. Y. Wang, and Yafei Jia; 132 (6), 462-76 (2006).

Doi, Yasuaki
Numerical and Experimental Study on Ship Wash Including Wave-Breaking on Shore — Chun-Beom Hong and Yasuaki Doi; 132 (5), 369-78 (2006).

Drimer, Nitai
Prediction of Long Forcing Waves for Harbor Agitation Studies — Michael Stiassnie and Nitai Drimer; 132 (3), 166-71 (2006).

Dunn, S. L.
Numerical Modeling of Wave-Induced Liquefaction around Pipelines — S. L. Dunn, P. L. Vun, A. H. C. Chan, and J. S. Damgaard; 132 (4), 276-88 (2006).

Elshorbagy, Walid
Hydrodynamic Characterization and Modeling of

the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).
3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).
Three-Dimensional Modeling of the Ruwais Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Ertekin, R. C.
Finite-Element Computation of Wave-Structure Interaction between Steep Stokes Waves and Vertical Cylinders — J. W. Kim, J. H. Kyoung, R. C. Ertekin, and K. J. Bai; 132 (5), 337-47 (2006).

Foray, P.
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).
Fluid-Soil-Structure Interaction in Liquefaction around a Cyclically Moving Cylinder — P. Foray, D. Bonjean, H. Michallet, and M. Mory; 132 (4), 289-99 (2006).
Guidelines for Pipeline On-Bottom Stability on Liquefied Noncohesive Seabeds — J. S. Damgaard, B. M. Sumer, T. C. Teh, A. C. Palmer, P. Foray, and D. Osorio; 132 (4), 300-9 (2006).

Fredsøe, Jørgen
Critical Flotation Density of Pipelines in Soils Liquefied by Waves and Density of Liquefied Soils — B. Mutlu Sumer, Figen Hatipoglu, Jørgen Fredsøe, and Niels-Erik Ottesen Hansen; 132 (4), 252-65 (2006).
Liquefaction around Pipelines under Waves — B. Mutlu Sumer, Christoffer Truelsen, and Jørgen Fredsøe; 132 (4), 266-75 (2006).

García, Marcelo H.
Burial of Short Cylinders Induced by Scour under Combined Waves and Currents — Yovanni A. Cataño-Lopera and Marcelo H. García; 132 (6), 439-49 (2006).

Grosenbaugh, Mark
Modeling of Seabed Interaction of Oceanographic Moorings in the Frequency Domain — Seon Han and Mark Grosenbaugh; 132 (6), 450-6 (2006).

Grotmaack, Rike
Wave Forcing of Small Floating Bodies — Rike Grotmaack and Michael H. Meylan; 132 (3), 192-8 (2006).

Hager, Willi H.
Plane Impulse Waves in Reservoirs — Andreas Zweifel, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 358-68 (2006).

Han, Seon
Modeling of Seabed Interaction of Oceanographic Moorings in the Frequency Domain — Seon Han and Mark Grosenbaugh; 132 (6), 450-6 (2006).

Hanes, Daniel M.
Closure to "One-Dimensional Wave Bottom Boundary Layer Model Comparison: Specific Eddy Viscosity and Turbulence Closure Models" by Jack A. Puleo, Oleg Mouraenko, and Daniel M. Hanes — Jack A. Puleo, Oleg Mouraenko, and Daniel M. Hanes; 132 (2), 141-2 (2006).

Hansen, Niels-Erik Ottesen
Critical Flotation Density of Pipelines in Soils Liquefied by Waves and Density of Liquefied Soils — B. Mutlu Sumer, Figen Hatipoglu, Jørgen Fredsøe, and Niels-Erik Ottesen Hansen; 132 (4), 252-65 (2006).

Hatipoglu, Figen
Critical Flotation Density of Pipelines in Soils Liquefied by Waves and Density of Liquefied Soils — B. Mutlu Sumer, Figen Hatipoglu, Jørgen Fredsøe, and Niels-Erik Ottesen Hansen; 132 (4), 252-65 (2006).

Hong, Chun-Beom
Numerical and Experimental Study on Ship Wash Including Wave-Breaking on Shore — Chun-Beom Hong and Yasuaki Doi; 132 (5), 369-78 (2006).

Ichikawa, Tetsuya
3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).

Ioualalen, M.
Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

James, M. K.
Closure to "Synthetic Tropical Cyclone Database" by M. K. James and L. B. Mason — M. K. James and L. B. Mason; 132 (6), 502-3 (2006).

Jepsen, Richard A.
Computational Fluid Dynamics Analysis of Flow in a Straight Flume for Sediment Erodibility Testing — Thomas M. Ravens and Richard A. Jepsen; 132 (6), 457-61 (2006).

Jia, Yafei
Development and Validation of a Quasi-Three-Dimensional Coastal Area Morphological Model — Yan Ding, Sam S. Y. Wang, and Yafei Jia; 132 (6), 462-76 (2006).

Kannah, T. Rajesh
Experimental Study on the Hydrodynamics of a Floating, Production, Storage, and Offloading System — T. Rajesh Kannah and R. Natarajan; 132 (1), 66-70 (2006).

Kepert, Jeffrey D.
Discussion of "Synthetic Tropical Cyclone Database" by M. K. James and L. B. Mason — Jeffrey D. Kepert; 132 (6), 501-2 (2006).

Kharif, C.
Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

Kim, J. W.
Finite-Element Computation of Wave-Structure Interaction between Steep Stokes Waves and Vertical Cylinders — J. W. Kim, J. H. Kyoung, R. C. Ertekin, and K. J. Bai; 132 (5), 337-47 (2006).

Kitamura, Yasushi
Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Koç, Levent
Closure to "Predictions of Missing Wave Data by Recurrent Neuronets" by Can Elmar Balas, Levent Koç, and Lale Balas — Can Elmar Balas, Levent Koç, and Lale Balas; 132 (1), 72-4 (2006).

Krishna, M. Sri
Design, Construction, and Installation of a Floating Caisson Used as a Bridge Pier — Subrata K. Chakrabarti, Partha Chakrabarti, and M. Sri Krishna; 132 (3), 143-56 (2006).

Kudella, M.
Large-Scale Experiments on Pore Pressure Generation underneath a Caisson Breakwater — M. Kudella, H. Oumeraci, M. B. de Groot, and P. Meijers; 132 (4), 310-24 (2006).
Liquefaction Phenomena underneath Marine Gravity Structures Subjected to Wave Loads — M. B. de Groot, M. Kudella, P. Meijers, and H. Oumeraci; 132 (4), 325-35 (2006).

Kyoung, J. H.
Finite-Element Computation of Wave-Structure Interaction between Steep Stokes Waves and Vertical Cylinders — J. W. Kim, J. H. Kyoung, R. C. Ertekin, and K. J. Bai; 132 (5), 337-47 (2006).

Lamberti, Alberto
Experimental Analysis and Numerical Simulations of Waves and Current Flows Around Low-Crested Rubble-Mound Structures — Barbara Zanuttigh and Alberto Lamberti; 132 (1), 10-27 (2006).

Li, Y. S.
Chebyshev Finite-Spectral Method for 1D Boussinesq-Type Equations — Y. S. Li and J. M. Zhan; 132 (3), 212-23 (2006).

Liou, Jin-Cheng
Solving Wave Dispersion Equation for Dissipative Media Using Homotopy Perturbation Technique — Hsien-Kuo Chang and Jin-Cheng Liou; 132 (1), 28-35 (2006).

Liu, R.
Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng, Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Lynett, Patrick J.
Nearshore Wave Modeling with High-Order Boussinesq-Type Equations — Patrick J. Lynett; 132 (5), 348-57 (2006).

Madsen, Ole Secher
Modeling Near-Shore Waves, Surface Rollers, and Undertow Velocity Profiles — Yoshimitsu Tajima and Ole Secher Madsen; 132 (6), 429-38 (2006).

Maeno, Shiro
DEM-FEM Model of Highly Saturated Soil Motion Due to Seepage Force — Lechosław G. Bierawski and Shiro Maeno; 132 (5), 401-9 (2006).

Mao, Xian-Zhong
Well-Balanced Finite-Volume Model for Long-Wave Runup — Yong Wei, Xian-Zhong Mao, and Kwok Fai Cheung; 132 (2), 114-24 (2006).

Marinucci, A.
Simple Dynamic Model for Fender Pile Analysis and Design — A. S. Bradshaw, C. D. P. Baxter, G. Tsiatas, A. Marinucci, J. Ressler, and R. Morgan; 132 (5), 419-22 (2006).

Mason, L. B.
Closure to "Synthetic Tropical Cyclone Database" by M. K. James and L. B. Mason — M. K. James and L. B. Mason; 132 (6), 502-3 (2006).

Medina, Josep R.
Discussion of "Predictions of Missing Wave Data by Recurrent Neuronets" by Can Elmar Balas, Levent Koç, and Lale Balas — Josep R. Medina and Obdulio Serrano-Hidalgo; 132 (1), 71-2 (2006).

Meijers, P.
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).
Large-Scale Experiments on Pore Pressure Generation underneath a Caisson Breakwater — M. Kudella, H. Oumeraci, M. B. de Groot, and P. Meijers; 132 (4), 310-24 (2006).
Liquefaction Phenomena underneath Marine Gravity Structures Subjected to Wave Loads — M. B. de Groot, M. Kudella, P. Meijers, and H. Oumeraci; 132 (4), 325-35 (2006).

Meylan, Michael H.
Wave Forcing of Small Floating Bodies — Rike Grotmaack and Michael H. Meylan; 132 (3), 192-8 (2006).

Michallet, H.
Fluid-Soil-Structure Interaction in Liquefaction around a Cyclically Moving Cylinder — P. Foray, D. Bonjean, H. Michallet, and M. Mory; 132 (4), 289-99 (2006).

Minor, Hans-Erwin
Plane Impulse Waves in Reservoirs — Andreas Zweifel, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 358-68 (2006).

Morgan, R.
Simple Dynamic Model for Fender Pile Analysis and Design — A. S. Bradshaw, C. D. P. Baxter, G. Tsiatas, A. Marinucci, J. Ressler, and R. Morgan; 132 (5), 419-22 (2006).

Morris, P. H.
Discussion of "Settlement of Dredged and Contaminated Material Placement Areas. II: Primary Consolidation, Secondary Compression, and Desiccation of Dredged Fill Input Parameters" by Timothy D. Stark, Hangseok Choi, and Paul R. Schroeder — P. H. Morris; 132 (5), 423-4 (2006).

Mory, M.
Fluid-Soil-Structure Interaction in Liquefaction around a Cyclically Moving Cylinder — P. Foray, D. Bonjean, H. Michallet, and M. Mory; 132 (4), 289-99 (2006).

Mouraenko, Oleg
Closure to "One-Dimensional Wave Bottom Boundary Layer Model Comparison: Specific Eddy Viscosity and Turbulence Closure Models" by Jack A. Puleo, Oleg Mouraenko, and Daniel M. Hanes — Jack A. Puleo, Oleg Mouraenko, and Daniel M. Hanes; 132 (2), 141-2 (2006).

Nakata, Kisaburo
Three-Dimensional Modeling of the Ruwais Coastal Area of United Arab Emirates — Mir Hammadul Azam, Walid Elshorbagy, and Kisaburo Nakata; 132 (6), 487-95 (2006).

Nakaza, Eizo
Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Namekar, Shailesh
Application of Artificial Neural Network Model in Estimation of Wave Spectra — Shailesh Namekar and M. C. Deo; 132 (5), 415-8 (2006).

Natarajan, R.
Experimental Study on the Hydrodynamics of a Floating, Production, Storage, and Offloading System — T. Rajesh Kannah and R. Natarajan; 132 (1), 66-70 (2006).

Ng, Wing-Cheong
Evaluating the Impact of Vessel-Traffic Interference on Container Terminal Capacity — Wing-Cheong Ng and Ching-Sze Wong; 132 (2), 76-82 (2006).

Okamura, M.
Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

Osorio, D.
Guidelines for Pipeline On-Bottom Stability on Liquefied Noncohesive Seabeds — J. S. Damgaard, B. M. Sumer, T. C. Teh, A. C. Palmer, P. Foray, and D. Osorio; 132 (4), 300-9 (2006).

Oumeraci, H.
Large-Scale Experiments on Pore Pressure Generation underneath a Caisson Breakwater — M. Kudella, H. Oumeraci, M. B. de Groot, and P. Meijers; 132 (4), 310-24 (2006).
Liquefaction Phenomena underneath Marine Gravity Structures Subjected to Wave Loads — M. B. de Groot, M. Kudella, P. Meijers, and H. Oumeraci; 132 (4), 325-35 (2006).

Palmer, A. C.
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).
Stability of Submarine Pipelines on Liquefied Seabeds — T. C. Teh, A. C. Palmer, M. D. Bolton, and J. S. Damgaard; 132 (4), 244-51 (2006).
Guidelines for Pipeline On-Bottom Stability on Liquefied Noncohesive Seabeds — J. S. Damgaard, B. M. Sumer, T. C. Teh, A. C. Palmer, P. Foray, and D. Osorio; 132 (4), 300-9 (2006).

Panchang, Vijay
A Note from the Editor — Vijay Panchang; 132 (2), 75 (2006).

Panizzo, Andrea
EOF Analysis of Complex Response of Venice Mobile Gates — Andrea Panizzo, Paolo Sammarco, Giorgio Bellotti, and Paolo De Girolamo; 132 (3), 172-9 (2006).

Pawlak, Geno
Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Pham, Xuan P.
Generic Design of V-Shape and Vane-Type Breakwaters to Reduce Green Water Load Effects on Deck Structures and Containers of Ships: Case Study — Xuan P. Pham and Kamlesh S. Varyani; 132 (1), 57-65 (2006).

Puleo, Jack A.
Closure to "One-Dimensional Wave Bottom Boundary Layer Model Comparison: Specific Eddy Viscosity and Turbulence Closure Models" by Jack A. Puleo, Oleg Mouraenko, and Daniel M. Hanes — Jack A. Puleo, Oleg Mouraenko, and Daniel M. Hanes; 132 (2), 141-2 (2006).

Rahaman, S. M. B.
Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Ravens, Thomas M.
Computational Fluid Dynamics Analysis of Flow in a Straight Flume for Sediment Erodibility Testing — Thomas M. Ravens and Richard A. Jepsen; 132 (6), 457-61 (2006).

Reeve, D. E.
Explicit Expression for Beach Response to Non-Stationary Forcing near a Groyne — D. E. Reeve; 132 (2), 125-32 (2006).

Ressler, J.
Simple Dynamic Model for Fender Pile Analysis and Design — A. S. Bradshaw, C. D. P. Baxter, G. Tsiatas, A. Marinucci, J. Ressler, and R. Morgan; 132 (5), 419-22 (2006).

Roarty, Hugh J.
Laboratory Measurements of Bed Load Sediment Transport Dynamics — Hugh J. Roarty and Michael S. Bruno; 132 (3), 199-211 (2006).

Roberts, A. J.
Computation of Short-Crested Deepwater Waves — M. Ioualalen, M. Okamura, S. Cornier, C. Kharif, and A. J. Roberts; 132 (3), 157-65 (2006).

Sammarco, Paolo
EOF Analysis of Complex Response of Venice Mobile Gates — Andrea Panizzo, Paolo Sammarco, Giorgio Bellotti, and Paolo De Girolamo; 132 (3), 172-9 (2006).

Sandven, R.
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).

Sawicki, A.
Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).

Schroeder, Paul R.
Closure to "Settlement of Dredged and Contaminated Material Placement Areas. II: Primary Consolidation, Secondary Compression, and Desiccation of Dredged Fill Input Parameters" by Timothy D. Stark, Hangseok Choi, and Paul R. Schroeder — Timothy D. Stark, Hangseok Choi, and Paul R. Schroeder; 132 (5), 424-5 (2006).

Serrano-Hidalgo, Obdulio
Discussion of "Predictions of Missing Wave Data by Recurrent Neuronets" by Can Elmar Balas, Levent Koç, and Lale Balas — Josep R. Medina and Obdulio Serrano-Hidalgo; 132 (1), 71-2 (2006).

Shen, Y. M.
Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng,

Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Shin, Sungwon

Hydrodynamic Characteristics of Pile-Supported Vertical Wall Breakwaters — Kyung-Duck Suh, Sungwon Shin, and Daniel T. Cox; 132 (2), 83-96 (2006).

Shintani, Tetsuya

Transformation, Attenuation, Setup, and Undertow of Internal Waves on a Gentle Slope — Motohiko Umeyama and Tetsuya Shintani; 132 (6), 477-86 (2006).

Spanos, Pol

Book Reviews — Pol Spanos; 132 (5), 426-7 (2006).

Stark, Timothy D.

Closure to "Settlement of Dredged and Contaminated Material Placement Areas. II: Primary Consolidation, Secondary Compression, and Desiccation of Dredged Fill Input Parameters" by Timothy D. Stark, Hangseok Choi, and Paul R. Schroeder — Timothy D. Stark, Hangseok Choi, and Paul R. Schroeder; 132 (5), 424-5 (2006).

Stiassnie, Michael

Prediction of Long Forcing Waves for Harbor Agitation Studies — Michael Stiassnie and Nitai Drimer; 132 (3), 166-71 (2006).

Stoschek, Oliver

Water Exchange and Sedimentation in an Estuarine Tidal Harbor Using Three-Dimensional Simulation — Oliver Stoschek and Claus Zimmermann; 132 (5), 410-4 (2006).

Styles, Richard

Application of a Bottom Boundary Layer Model in Contrasting Wave and Current Environments: Grays Harbor, Washington — Richard Styles; 132 (5), 379-87 (2006).

Suh, Kyung-Duck

Hydrodynamic Characteristics of Pile-Supported Vertical Wall Breakwaters — Kyung-Duck Suh, Sungwon Shin, and Daniel T. Cox; 132 (2), 83-96 (2006).

Sumer, B. Mutlu

Special Issue on Liquefaction around Marine Structures — B. Mutlu Sumer; 132 (4), 225-6 (2006).

Critical Flotation Density of Pipelines in Soils Liquefied by Waves and Density of Liquefied Soils — B. Mutlu Sumer, Figen Hatipoglu, Jørgen Fredsoe, and Niels-Erik Ottesen Hansen; 132 (4), 252-65 (2006).

Liquefaction around Pipelines under Waves — B. Mutlu Sumer, Christoffer Truelsen, and Jørgen Fredsøe; 132 (4), 266-75 (2006).

Guidelines for Pipeline On-Bottom Stability on Liquefied Noncohesive Seabeds — J. S. Damgaard, B. M. Sumer, T. C. Teh, A. C. Palmer, P. Foray, and D. Osorio; 132 (4), 300-9 (2006).

Taguchi, Koichi

Hydrodynamic Characterization and Modeling of the Arabian Gulf — Walid Elshorbagy, Mir Hammadul Azam, and Koichi Taguchi; 132 (1), 47-56 (2006).

3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).

Tajima, Yoshimitsu

Modeling Near-Shore Waves, Surface Rollers, and Undertow Velocity Profiles — Yoshimitsu Tajima and Ole Secher Madsen; 132 (6), 429-38 (2006).

Tayfun, M. Aziz

Distributions of Wave Steepness and Surf Parameter — M. Aziz Tayfun; 132 (1), 1-9 (2006).

Teh, T. C.

Physics of Liquefaction Phenomena around Marine Structures — M. B. de Groot, M. D. Bolton, P. Foray, P. Meijers, A. C. Palmer, R. Sandven, A. Sawicki, and T. C. Teh; 132 (4), 227-43 (2006).

Stability of Submarine Pipelines on Liquefied Seabeds — T. C. Teh, A. C. Palmer, M. D. Bolton, and J. S. Damgaard; 132 (4), 244-51 (2006).

Guidelines for Pipeline On-Bottom Stability on Liquefied Noncohesive Seabeds — J. S. Damgaard, B. M. Sumer, T. C. Teh, A. C. Palmer, P. Foray, and D. Osorio; 132 (4), 300-9 (2006).

Terasawa, Tomohiko

3D Model Application to Study Residual Flow in the Arabian Gulf — Mir Hammadul Azam, Walid Elshorbagy, Tetsuya Ichikawa, Tomohiko Terasawa, and Koichi Taguchi; 132 (5), 388-400 (2006).

Truelsen, Christoffer

Liquefaction around Pipelines under Waves — B. Mutlu Sumer, Christoffer Truelsen, and Jørgen Fredsøe; 132 (4), 266-75 (2006).

Tsiatas, G.

Simple Dynamic Model for Fender Pile Analysis and Design — A. S. Bradshaw, C. D. P. Baxter, G. Tsiatas, A. Marinucci, J. Ressler, and R. Morgan; 132 (5), 419-22 (2006).

Tsukayama, Seikoh

Cross-Shore Internal Waves in Zanpa Coastal Region of Okinawa Island — Eizo Nakaza, S. M. B. Rahaman, Yasushi Kitamura, Geno Pawlak, and Seikoh Tsukayama; 132 (1), 36-46 (2006).

Turner, Ian L.

Discriminating Modes of Shoreline Response to Offshore-Detached Structures — Ian L. Turner; 132 (3), 180-91 (2006).

Umeyama, Motohiko

Transformation, Attenuation, Setup, and Undertow of Internal Waves on a Gentle Slope — Motohiko Umeyama and Tetsuya Shintani; 132 (6), 477-86 (2006).

Varyani, Kamlesh S.

Generic Design of V-Shape and Vane-Type Breakwaters to Reduce Green Water Load Effects on Deck Structures and Containers of Ships: Case Study — Xuan P. Pham and Kamlesh S. Varyani; 132 (1), 57-65 (2006).

Vun, P. L.

Numerical Modeling of Wave-Induced Liquefaction around Pipelines — S. L. Dunn, P. L. Vun, A. H. C. Chan, and J. S. Damgaard; 132 (4), 276-88 (2006).

Wang, Sam S. Y.

Development and Validation of a Quasi-Three-Dimensional Coastal Area Morphological Model — Yan Ding, Sam S. Y. Wang, and Yafei Jia; 132 (6), 462-76 (2006).

Wei, Yong

Well-Balanced Finite-Volume Model for Long-Wave Runup — Yong Wei, Xian-Zhong Mao, and Kwok Fai Cheung; 132 (2), 114-24 (2006).

Wong, Ching-Sze

Evaluating the Impact of Vessel-Traffic Interference on Container Terminal Capacity — Wing-Cheong Ng and Ching-Sze Wong; 132 (2), 76-82 (2006).

Wu, Bi-Jun

Response Amplitude and Hydrodynamic Force for a Buoy over a Convex — Bi-Jun Wu, Yong-Hong Zheng, and Ya-Ge You; 132 (2), 97-105 (2006).

Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng, Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Yeh, Harry

Maximum Fluid Forces in the Tsunami Runup Zone — Harry Yeh; 132 (6), 496-500 (2006).

You, Ya-Ge

Response Amplitude and Hydrodynamic Force for a Buoy over a Convex — Bi-Jun Wu, Yong-Hong Zheng, and Ya-Ge You; 132 (2), 97-105 (2006).

Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng, Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Zanuttigh, Barbara

Experimental Analysis and Numerical Simulations of Waves and Current Flows Around Low-Crested Rubble-Mound Structures — Barbara Zanuttigh and Alberto Lamberti; 132 (1), 10-27 (2006).

Zhan, J. M.

Chebyshev Finite-Spectral Method for 1D Boussinesq-Type Equations — Y. S. Li and J. M. Zhan; 132 (3), 212-23 (2006).

Zheng, Yong-Hong

Response Amplitude and Hydrodynamic Force for a Buoy over a Convex — Bi-Jun Wu, Yong-Hong Zheng, and Ya-Ge You; 132 (2), 97-105 (2006).

Scattering of Linear Water Waves by a Fixed and Infinitely Long Rectangular Structure Parallel to a Vertical Wall in Oblique Seas — Y. H. Zheng, Y. M. Shen, Y. G. You, B. J. Wu, and R. Liu; 132 (2), 106-13 (2006).

Zimmermann, Claus

Water Exchange and Sedimentation in an Estuarine Tidal Harbor Using Three-Dimensional Simulation — Oliver Stoschek and Claus Zimmermann; 132 (5), 410-4 (2006).

Zweifel, Andreas

Plane Impulse Waves in Reservoirs — Andreas Zweifel, Willi H. Hager, and Hans-Erwin Minor; 132 (5), 358-68 (2006).
